

# SECURITY & FACILITIES

**omegabit**

*Liferay Certified managed hosting solutions*

We build to suit

Liferay trained and certified personnel

Privately owned and operated Liferay optimized cloud infrastructure

Dedicated hardware available

Professional application and network monitoring

24x7x365 emergency response and on premises attendance

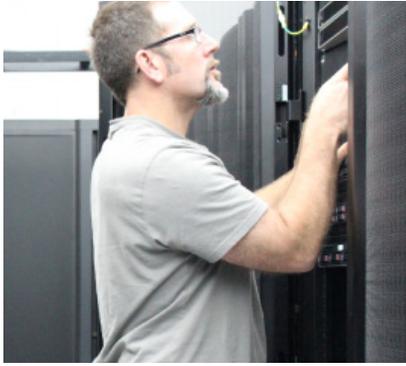

## OVERVIEW

Where most hosting companies draw the line, that's where we get started. Our staff is able to anticipate, troubleshoot, support and advise you on Liferay like no other provider can. All environments include monitoring and backup, aid with configuration adjustments and recommended procedures for change management. And, we're here to assist with architecture and scale planning for high capacity and high availability implementations.

## SECURITY

Our private cloud infrastructure is optimized and managed specifically for Liferay hosting from one of our regionally distributed, world-class colocation facilities. Our facilities are attended by on-site personnel 24x7x365 and include human and biometric identity verification for access control. We monitor all applications and systems for performance, indications of stability and for diagnostic purposes, while offering a variety of reporting tools for self-service site analytics and host monitoring. Daily backups included with all installations.

## FACILITIES

We are very proud of our world-class hosting facilities designed for global performance, high availability and security.

- Primary Operations Center located in San Luis Obispo, CA
