provider

Liferay Certified managed hosting solutions

Expect more from your Liferay hosting provider.

Omegabit Liferay Certified Portal Hosting offers the best value, performance, and security available, with more managed hosting experience than any other operator, featuring:

- The fastest, Liferay optimized private cloud infrastructure available.
- Liferay certified technical support and runtime management.
- 24x7x365 emergency response.
- Better runtime security than turnkey hosting providers, including active intrusion and zero hour threat prevention, special procedures, Liferay-aware hardening, and more.
- We build to suit and can match any technical, security, or business requirement.
- Better quality of service, faster performance and lower TCO than turnkey operators.

We want to be your experts for custom Liferay runtime operations, security, optimization, tuning, and support. We will work harder than any provider to earn your business and trust.

— Chris Stavros, President

Moving to DXP? We can help.

Let us help to ensure your transition to DXP is smooth. Whether implementing DXP from scratch, or as part of a migration from a previous version of Liferay, we'll help you make informed choices and assist with sandboxing, change management, custom plugin porting, and other key procedures using proven migration methods.

An excellent complement to your project & teams.

As a preferred hosting provider for Liferay Certified Developer Partners, Omegabit provides infrastructure and change management support so your teams can focus on building and operating your Liferay applications. We specialize in sustaining the operation of custom Liferays once built and released—even if the project team moves on. We can help your projects move faster, with fewer headaches and better sustainability, leaving you to focus on working with Liferay, not making Liferay work for you.

Host Enterprise Edition with us and save.

Did you know that when you host with Omegabit in California you may benefit from substantial savings on Liferay Enterprise Edition sales tax obligations? Ask us how our software as a service model can help save money and streamline your procurement process.

Make informed, experience based decisions.

With our deep background of experience in engineering custom Liferay portals, Omegabit is the only dedicated Liferay hosting services provider that offers comprehensive, Liferay-aware architecture planning and support.

We're here to make sure you get the most out of your Liferay infrastructure and can help you to make informed decisions that impact ROI.

Talk to us today to learn how we can assist with:

- Liferay host architecture and operations
- Design approach and economies of scale
- How to maximize your licensing dollars
- Caching and acceleration
- Load testing and performance optimization
- Development life cycle
- SSO and identity integration

Security at every level.

Your security is our security. All environments are pre-hardened and tuned to meet your requirements. We operate active intrusion and zero day threat detecting firewalls, perform regular penetration testing, respond immediately to known published threats, and actively maintain and improve security measures of our environments to ensure continuous protection against the evolving threats on the Internet.

Our Security Program is multi-faceted and includes:

- SOC-2 Type II compliant operations
- PCI, HIPPA, FERPA, FEDRAMP and similar certification compatibility and audit support
- On site monitoring and daily backups 24x7x365; comprehensive disaster recovery
- Secure network infrastructure isolation and hardening
- Configuration and administrative support using best practices for secure operations

Our world-class facilities feature:

- CCTV surveillance, biometric access control
- Solid utility power + automatic standby generator power
- N+1 cooling system
- Carrier redundant facility w/direct cross connects
- Global performance response time monitoring
- Dual-interlock, dry-pipe pre-action fire suppression system
- Seismic rack mount protection
- Separate physical fiber entrances
- Redundant, regionally distributed facilities

Contact us today...

Whether you require standard hosting, advanced administration and professional services, or Enterprise Edition licensing, let us demonstrate to you how we can save you time and money with a higher quality of service. Our flexible pricing also makes it easy to grow into a larger footprint with confidence and cost control.
