

CUSTOM Solutions

Custom high-performance hosted solutions that offer high availability, high volume, scalability, and security. Hosting environments built to suit your needs.

877-411-2220 • portal@omegabit.com

Think beyond the single server. Your operations are unique and require more than a one-size-fits-all solution. A custom configuration may be what you need to run your application efficiently, and achieve your business goals.

We'll help you design custom configurations for any network scenario. Omegabit's team will utilize their Liferay and technical expertise to build and deploy a high performance solution that fits your specific needs.

Affordably priced, customization prepares you for scaling as you grow and ensures your solution meets your exact technical criteria and performance needs. With 24/7/365 technical support you can be sure you can stay focused on your business, not your hosting solution.

From load-balancing and high availability clusters, to disaster recovery and PCI compliance, custom solutions are available to accommodate the most complex hosting needs.

EPSILON Server

For enterprise and business-critical applications, or where comprehensive administrative control is required.

\$169.99/mo

Includes comprehensive control and dedicated computing power. Great for custom development, sandbox or production, hosting parallel services. This environment includes full root access and can be scaled for high-availability, high-performance clustering and fault-tolerant configurations, and customized to meet your specific needs.

- Supports 100s of concurrent users under a heavy load
- Supports multiple 1000s of visitors
- Supports over 50K page views per day
- Dedicated OS on 2+ Core Environment
- 4GB+ Memory
- High Performance Dedicated Java VM
- 250GB+ Dedicated File Storage
- Dedicated Production-ready MySQL Database Server
- Fully portable and expandable

No Obligation 30-day Free Trial
Money Back Satisfaction Guarantee
Cancel Anytime

DELTA Server

A dedicated Liferay installation with full Liferay Administrator control, support for custom plugins, and capacity for workgroup-sized user loads.

\$39.99/mo

This environment is great for production-ready installations or to deploy pretested custom plugins. It includes full Portal Administrator control, but not direct OS or MySQL root-level access.

- Supports 20-50 concurrent users
- Supports multiple 100s to 1000s of visitors
- Supports over 40K page views per day
- Private Liferay instance with dedicated file repository and db schema
- High Performance Dedicated Java VM
- 2GB+ Memory
- 50GB+ Dedicated File Storage
- Production-ready MySQL Database Server
- Fully portable and expandable

No Obligation 30-day Free Trial
Money Back Satisfaction Guarantee
Cancel Anytime

Liferay Certified managed hosting solutions

Liferay Certified Hosting Specialists.

Our environments are hand-tuned and come with more dedicated memory, more CPU, more storage and more bandwidth, providing the best value and performance. We deal with maintenance, backups, monitoring and performance tuning so that you can focus on building your Liferay.
