Liferay Certified managed hosting solutions

CUSTOM Solutions Hosting environments built to suit your needs — our custom high-performance hosting solutions provide high availability, high volume, scalability, and security. Think beyond the single server. We'll help you design custom configurations for any network scenario. Omegabit's team will utilize their Liferay and technical expertise to build and deploy a high performance solution that fits your specific needs. Affordably priced, customization prepares you for scaling as you grow and ensures your solution meets your exact technical criteria and performance needs. With 24/7/365 technical support you can be sure you can stay focused on your business, not your hosting solution. From load-balancing and high availability clusters, to disaster recovery and PCI compliance, custom solutions are available to accommodate the most complex hosting needs.
