Benefits of the Omegabit Cloud

Omegabit is proud to offer a number of benefits that are unique to our product offerings and infrastructure design.

- Liferay-aware first-responders, monitoring, and support staff
- Liferay Application Managed Services (management and optimization of all layers of infrastructure)
- Liferay Performance Optimization and Architecture Consulting
- Liferay Certified Direct Tier-I Enterprise Edition Support Provider and Partner
- Liferay optimized host infrastructure
- High-speed SAN+NAS storage technology for OS VMs & Liferay clustering with no I/O bottlenecks
- Native support for Liferay multicast clustering, and EE Enhanced Distributed Cache Algorithm
- Load testing, and diagnostic services
- Direct, long-standing relationship with Liferay, Inc. and its Partners

Omegabit Infrastructure

Privately owned and operated, our Liferay-optimized cloud infrastructure offers better performance and diagnostics.

- SOC-2 Certified, PCI-I Compliant NOC

- Professional Application and Network Monitoring and Response 24x7x365

- Multiple layers of hard line physical security and electronic controlled access

- Redundant file systems, regular backups, Liferay-specific monitoring, 24hr response

- Omegabit owns and operates all of our firewall and server equipment – no outsourcing

- VPN links provided for dedicated installations

Omegabit

Data Center Specs

Servers are housed in secure, fireproof, climate-controlled data centers with carrier-class connections to the Internet backbone. Multiple, high-speed connections ensure your site is always up and running. The Network Operations Center is staffed around the clock to respond to emergencies.

- High security environment with 24x7 professional security staff, physical and electronic controlled access, video surveillance.

- Direct Peering Partner Network links available.

- Robust building grounding system and cooling infrastructure. Seismic-mounted cabinets are facility standard.

- Automated monitoring of power and environmental systems, including fire detection and prevention systems.
